

HELP YOUR CLIENT'S DOGS MOVE FREELY AGAIN!

Australian Canine Elbow Osteoarthritis Clinical Trial

Do you know a dog struggling with elbow pain, lameness, or stiffness?

We're currently recruiting dogs for a key clinical trial of ArthramidVet® — an advanced injectable treatment for canine elbow osteoarthritis. It contains 2.5% polyacrylamide hydrogel (2.5% iPAAG®), designed to restore joint health and mobility.

Why Join the Trial?

- All study-related veterinary care, medications, and monitoring provided at NO COST
- Expert care at leading specialist clinics in NSW & QLD
- Potential for long-lasting pain relief and improved mobility
- Owners of control group dogs receive free ArthramidVet® treatment after trial completion

Who Can Join?

- Dogs of any breed, aged **1-12 years**
- Bodyweight **10-50 kg**
- Primary Clinical signs/history of **arthritis primarily in one or both elbows.**
- Other joints may be affected by OA, but elbows must be the most severely affected joint(s).
- Dog otherwise in good health.
- Most previous and concurrent medications permitted
- Imaging (X-ray/CT) confirming elbow arthritis (can be done within 6 months of trial start, or at our cost at -21 days)

Give your canine patients the chance to move, play, and enjoy life again.

Signs A Dog May Have Elbow OA:

- Limping or lameness (especially after rest or exercise)
- Stiffness, reluctance to play or jump
- Pain on manipulation of the elbow
- Reduced activity or change in gait

What's Involved?

- Screening and assessment at a participating clinic
- 12-week follow-up with regular check-ups and owner feedback
- Random allocation to treatment or control group (blinded study)
- Free treatment for control dogs after trial

Participating Clinics:

NSW:

- The Pet Specialists, Terrey Hills
- SASH North Ryde
- SASH Central Coast

QLD:

- Queensland Vet Specialists, Stafford
- Veterinary Specialist Services, Gold Coast

Referring Vets:

- **Refer a case and receive a \$25 gift card for each dog recruited!**
- Recruitment posters and social media content available on request.
